UNVEILING FOUR NEW CONCEPTS

Check out the new flavors and decor in your servery this Fall! Some are updates of SAGE classics, others are brand new. All are designed to engage the community with exciting new tastes and a creative flair.

Crossroads is SAGE's innovative casual foods concept which sits at the intersection of fun and flavor. It expands and replaces the original JD's Grill to include a broad range of options that are fast, fun and portable, the kind you'd find at food trucks or mobile food carts. Look for **stainless steel tiles and serving spoons** to emulate the counter of a food truck.

Vegitas is SAGE's showpiece for chef-inspired vegetarian and vegan fare. Our goal is to make complete and nutritionally balanced vegetarian dining simple and convenient. The **black and white tiles and serving utensils** are evocative of the simple, clean lines of farm life.

The aromas, colors and flavors of East Asia beckon in SAGE's newest station concept, **Pacific Thyme**. Here, we focus on the culinary traditions of nations bordering the eastern Pacific Ocean, from China, Japan and Korea in the North, to Thailand, Cambodia, Vietnam and Indonesia in the South. The **deep red tiles and serving ware** represent the lacquered looks of Asia.

Paquito's is SAGE's showpiece for modern Latin cuisine, moving beyond familiar Mexican staples to explore the diverse cuisines of The New World. Displayed with **turquoise tiles and colorful spoons**, we're offering exciting new foods like Cuban ropa vieja and Argentine empanadas to tempt the senses and broaden our understanding of Latin food and culture.
