SAGE Dining Services® Launches Custom-Built “Touch of SAGE” Mobile App

Lutherville, MD — SAGE Dining Services’ customers are able to stay in touch with SAGE 24/7 with the new “Touch of SAGE” mobile app launched to the company’s 250 locations this week.

The in-house, custom built application is free and available on Android and iOS systems for any device. Parents can set it up for every child they have at a SAGE school, and students, faculty and staff can also access it.

The app interfaces with each venue’s menus, and ingredient lists, and provides a comprehensive allergen filter. Parents can use the app to guide their children’s selections for the day, and even “recommend” certain food items. Students can use the app to see their parents’ recommendations, favorite items that they enjoy, see school-specific events, and give feedback on items that goes directly to their SAGE Chef.

“Today’s parents and students are busier than ever, but lunch at school is important. At SAGE, we believe that selecting the best meals provides a great opportunity for discussion and learning,” says Paco Rodriguez, President and Co-Founder of SAGE. “Touch of SAGE makes planning meals easy, and provides a vehicle for parents to have a dialogue with their children about what they should select to eat, especially if they have a food allergy.”

For more information on the Touch of SAGE app, view this video - <https://vimeo.com/208365958>.
